Detailed explanation of the core rules for the export of photovoltaic modules, including HS classification (assembled modules ...

This marks another record year for PV deployment, despite continued overcapacity in manufacturing and falling module prices that placed pressure on the entire value chain.

China exported 235.93 GW of PV modules in 2024, up 13% from 207.99 GW in 2023, according to customs data from PV InfoLink. ...

India's solar photovoltaic (PV) module exports have seen a remarkable surge, increasing nearly 23-fold from FY22 to FY24, ...

India's solar cell and module exports recorded a robust 65.2 per cent year-on-year growth in the third quarter of 2025, reaching \$344.5 million, according to a recent report by Mercom Capital. ...

A leading module manufacturer told OPIS that while cost pressures are genuine, the sustainability of price hikes remains uncertain, ...

China has reduced the export tax rebate for solar products, lowering refunded taxes for Chinese PV exporters and eating into their profit margins. The move might force ...

The export of Indian photovoltaic (PV) modules has risen exponentially by more than 23 times between Fiscal Year (FY) 2022 and ...

India's solar photovoltaic (PV) module exports have seen a remarkable surge, increasing nearly 23-fold from FY22 to FY24, according to a report by the Institute for Energy ...

Recent developments in U.S. trade policy are reshaping the competitive landscape for solar exports--and India finds itself facing new ...

As of November 2024, exports for FY 2024-25 have already reached \$782 million, according to minister of state for new and renewable energy and power, Shripad Yesso Naik. ...

China's solar PV module exports hit 236 GW in 2024, with growth in all regions except Europe ... China exported 16.63 GW of modules in December 2024, up 9% MoM from ...

Cells and wafers now make up over 40% of China's solar product exports in the first half of 2025. Panel exports are stagnating due to stockpile drawdowns and slowing ...

In April 2025, China's PV module exports to individual countries were ranked as follows: the Netherlands, Pakistan, Saudi Arabia, Spain, and France. The combined imports of ...

China's total module exports from January to September 2025 reached 206 GW, up 10% YoY from 187 GW. In September 2025, the top five single-country importers of ...

US tariffs significantly reduce India's solar PV module exports in Q3 2025, impacting competitiveness and industry dynamics.

India exported \$782 million worth of PV modules from April to November 2024, with \$756.08 million shipped to the United States, says ...

InfoLink's customs data shows that China exported about 21.39 GW of PV modules in April 2025, down nearly 9% MoM but up 2% YoY from 20.93 GW. As of the end of ...
