Does 3G affect solar production?

Production-wise, 3G does not impact your solar system's ability to produce clean energy. The cellular device in the inverter is merely the communication method that enables system monitoring, and while it is housed within the inverter, it does not impact solar production.

Who is 3gsolar?

3GSolar is a global leader in Dye Solar Cells ("DSC"), a printed photovoltaic cell that supplies energy under conditions where others cannot. Our products power indoor electronics and sensors, revolutionizing wireless devices by eliminating the need to ever replace batteries and making them truly maintenance-free.

Which mobile carriers are shutting down 3G networks in 2022?

In 2022 all major mobile carriers - including AT&T, T-Mobile, and Verizon - are shutting down their 3G networks, impacting several solar system owners in the U.S. who installed 3G modems as a part of their solar panel systems.

Who is 3gsolar supplying its cells to?

3GSolar is now supplying its cells to European and USA companies manufacturing sensors and beacons, and we have a contract with Israel Aerospace Industries. In parallel, 3GSolar is in discussions with multinational electronics corporations from Asia.
