Do data center racks offer seismic protection?

Most manufacturers of data center racks, computer server racks, and enclosures offer products that are marketed as offering "seismic protection"; however, there can be big differences in the standards used to achieve those labels, and major disparities in the level of protection that those products provide.

What happens to computer server racks in an earthquake?

In the event of an earthquake or seismic event, the type of computer server racks and server rack enclosures used to house data center IT equipment is critical. This rack is often the deciding factor in whether or not the equipment will remain active.

What is a standard server rack?

Standard Server Rack A standard server rack is often quite a bit cheaper than more robust versions,but these are still long-lasting durable high quality racks designed for deployment in any data center in the country.

What is a NEMA 12 rackmount enclosure?

Built to NEMA 12 specs (IP54 equivalent) when dust and water drips or splash resistant racks are required. These Rackmount enclosures are offered up to 47u with up to 41.75" usable rack depth. Useful in factory environments,construction areas,power stations,shipping facilities,warehouses or processing plants.
