What is EPC for data centers?

With our EPC for Data Centers services, we offer comprehensive solutions that cover engineering, procurement, and construction. From design to deployment, we ensure your data center operates with unmatched efficiency, reliability, and scalability. Let us be your trusted partner in...

Who can benefit from EPC services?

Our EPC services cater to businesses of all sizes, but are especially beneficial for: Enterprises looking to scale operations and increase IT reliability. Cloud Service Providers requiring highly efficient and scalable hosting environments. AI & Big Data Firms needing robust, high-performance infrastructure.

Should you hire a data center engineering contractor?

Given the specialist nature of data centers, data center owners and investors commissioning data centers typically look to employ a contractor with data center engineering expertise to act as a single point of responsibility to deliver both the design and the construction of the facility.

How much does it cost to build a data center?

In our experience, smaller data center projects, such as data centers for commercial cloud services with construction cost of less than 500 million USD, tend to be procured on a guaranteed maximum price model whereby the contractor absorbs all additional costs of beyond a pre-agreed maximum price.

Read how Mortenson approaches the construction of data centers as a solution provider, not just a contractor responsible for building from a set of plans.
