Should I Choose IP67 or IP65 cabinets?

Consider removable inner door panels for quick access and cleaning. IP67 cabinets typically cost more due to dual-seal construction. Choose them only when immersion risk is real. For high-pressure washdown, IP66 offers better value than IP65 plus additional spray protection.

What is the difference between IP55 & IP65 rated cabinets?

IP55: Electrical panels in non-sterile hospital zones where periodic sanitization occurs. IP65+: Laboratories, operating rooms with frequent disinfection procedures. Our stainless-steel IP-rated cabinets comply with hygiene-critical applications, ensuring cleanability and resistance to medical-grade cleaners.

Is IP67 better than IP65?

IP67 cabinets typically cost more due to dual-seal construction. Choose them only when immersion risk is real. For high-pressure washdown, IP66 offers better value than IP65 plus additional spray protection. Why E-abel?

Should I use IP54 or IP65+ water protection equipment?

Periodic water spray is expected but not at high pressure. You want higher protection than IP54 without the cost or weight of full IP65+. Direct exposure to pressurized water or outdoor storms is expected. Equipment is installed in marine, underground, or industrial washdown zones.
