Will battery energy storage reshape Asia?

Southeast Asia is shifting from the sidelines of battery storage to the centre of a global energy transition. It is on the brink of a battery energy storage (BESS) leap that could reshape its energy systems. The region's market is valued at around USD3.5 billion in 2024 and is projected to approach USD5 billion by 2030, expanding at 6% CAGR.

Which country has the most policy driven battery storage market in Southeast Asia?

The Philippines has become the most policy driven battery storage market in Southeast Asia. Through Green Energy Auction Program (GEA) 4, the Department of Energy has integrated storage as a mandatory element of large-scale renewable tenders. This decision has created a multi gigawatt pipeline of projects that have a clear commercial path.

Will Southeast Asia's battery storage market hit USD 5 bn by 2030?

their businesses - and we can do the same for you. Southeast Asia's battery storage market is set to hit USD 5 Bn by 2030, driven by policy, tech shifts, and energy demands in Vietnam, Philippines & Thailand.

How important is software capability in Southeast Asia's BESS market?

In Southeast Asia's BESS market, software capability is quickly becoming as important as the battery hardware itself. The most competitive storage systems are those paired with advanced energy management systems (EMS) that can handle multiple operational objectives simultaneously.
