What are outdoor Telecom cabinets?

Our outdoor telecom cabinets are designed to protect your sensitive network equipment from harsh environments where equipment may be exposed to dust or water. For added protection, there is a water and dust proof polyurethane door joint strip.

What is an outdoor telecommunication enclosure?

Damage-resistant and reliable outdoor enclosures are key for outdoor telecommunication applications from cell tower sites and fiber optic networks to substations. These specialized cabinets house and protect sensitive equipment like routers, switches, and other network devices.

What are the requirements for a telecom cabinet?

Compliance with Standards: Depending on the region, the cabinet must meet specific industry standards such as IP (Ingress Protection) ratings, seismic ratings, or fire safety standards. This general process may vary slightly depending on the manufacturer and specific requirements of the telecom project.

How is a telecom cabinet installed?

Installation: The cabinet is installed on-site, typically on a concrete pad or mounting base. All telecom equipment is configured and connected to the appropriate power sources and communication lines.

DDB Unlimited manufactures NEMA outdoor cabinets to protect telecommunications, fiber optics, Wi-Fi and other electronics from the outdoors.

Our cabinets are built to withstand harsh weather conditions and provide excellent protection for power management systems, telecom base ...
