Does Argentina have a battery energy storage system?

Argentina has taken a major step toward modernizing its energy infrastructure with the launch of a 500 MW battery energy storage system (BESS) tender under the AlmaGBA program.

Why is Buenos Aires investing \$540 million in energy storage?

The \$540 million investment in energy storage isn't just about keeping the lights on in Buenos Aires. It's a strategic bet on a more flexible, reliable, and sustainable energy future for Argentina - and potentially, a blueprint for the entire region. What role will energy storage play in your country's energy transition?

Why is Argentina a good stance on energy storage?

In Argentina, the stance provides a good lesson to the European stakeholders, especially in the commercial and industrial segments of energy storage. Emerging markets can present both local and foreign players by developing tenders that are investment appropriate and clear technically and financially secured.

Is Buenos Aires a good place to buy a battery?

Buenos Aires, with its dense urban load and aging infrastructure, is an ideal candidate for such an upgrade. Moreover, this tender arrives at a time when battery prices are becoming increasingly competitive, and international developers are actively seeking new markets with clear regulatory frameworks and stable revenue models.

On February 18, 2025, Argentina's Wholesale Electricity Market Administration Company (CAMMESA) released a contract template to assist participants in the 500 MW ...
