Which sector is most energy efficient in Bosnia & Herzegovina?

Residential sector is the largest individual segment considered in the NEEAP with about 58% of the baseline net final energy consumption which was 145.54 PJ (3476.1 ktoe) for Bosnia and Herzegovina. Minimum energy efficiency standard for energy powered household devices;

Should Bosnia and Herzegovina use more energy?

Bosnia and Herzegovina could do a lot more to use energy efficiently. Electricity prices are kept artificially low and there is therefore limited incentive to make savings. The country is almost four times as energy-intensive as the average in EU countries and has the highest energy intensity in the Western Balkans.

How much does electricity cost in Bosnia & Herzegovina?

Bosnia and Herzegovina, March 2023: The price of electricity is 0.097 U.S. Dollar per kWh for households and 0.110 U.S. Dollar for businesses which includes all components of the electricity bill such as the cost of power, distribution and taxes.

What are the energy resources of Bosnia and Herzegovina?

B&H is recognizable as a country with significant energy resources, both conventional and renewable. First of all, there is coal in parts of central Bosnia, as well as in the northeastern part of B&H and eastern Herzegovina.

ng energy consumption. Areas for determining additional objectives arise from the developed strategic documents of Bosnia and Herzegovina, which, among other things, contain ...
