Can solar panels be installed on a tile roof?

Yes,solar panels can be installed on a tile roof. A preferred technique is called an inset solar installation,or 'comp-out',which adds additional steps and costs but provides long-term durability and helps prevent damage to your home.

How do I install solar panels on a lightweight tile roof?

The best way to install solar panels on a lightweight tile roof is through a method called inset solar installation,also known as a "comp-out" installation. This technique removes the section of tile where the solar panels will be installed and replaces it with composite shingles before mounting the solar array.

Can solar be installed on clay tiled roofs?

Clay tile roofs,which are common in the American southwest,can be a challenge for solar installers. While they have cultural significance and longevity,installing solar panels on them has historically been more expensive and risky than other roof types.

Can solar panels damage a tile roof?

Future damage from vibrations: Even if tiles remain intact during installation, they can weaken over time. Wind moving between the solar panels and the racking system can create vibrations that cause tiles to crack down the road. Because of these risks, standard installation methods won't work for tile roofs --especially lightweight ones.
