What is the European energy storage inventory?

The European energy storage inventory is a platform developed to map and monitor the energy storage facilities across Europe. The information provided by the platform is used in this section to present the progress in energy storage deployment. The analysis is made by statuses, by countries, by technologies and by services. 2.1.

How many energy storage projects are there in Europe?

A total of 2 356 energy storage projects have been identified, with a combined power of 170.92 GW. Of these: -- 3.66 GW are currently inactive. Taking into account these amounts of operational and expected power, we can affirm that Europe is at a pivotal stage in the deployment of energy storage systems.

How can European energy storage systems support renewable generation?

European energy storage inventory . With the common target of 20 % renewable energy use by 2020 and 42.5 % by 2030, many Member States have introduced economic support programmes for renewable generation. In this context, PSH systems could facilitate their expansion.

Who is leading energy storage innovation in Europe?

Here Tamarindo's Energy Storage Report highlights those players that have been at the forefront of storage innovation in Italy, Germany, Spain, France and Ireland in recent months.
