-----  
Why should you invest in EV charging infrastructure in Vietnam?

Amid the booming electric vehicle (EV) movement in Vietnam, the demand for sustainable and safe EV charging infrastructure has become more urgent than ever. This presents both opportunities and challenges for investors and high-quality electrical equipment providers like BTB Electric.

Where are the charging stations located in Vietnam?

Geographical Distribution: Wide but Uneven The charging stations are most concentrated in Hanoi, Ho Chi Minh City, Danang, and Hai Phong, the country's economic powerhouses with high mobility demands. These stations are primarily installed in apartment building parking lots, shopping malls, gas stations, and office buildings.

Does Vietnam have a battery swapping system?

At present, Vietnam's two-wheeler charging network and battery swapping system are still limited, and users mainly charge at home. Lack of charging infrastructure and the laying out of battery swapping systems can make it difficult for users to recharge their batteries.

How many charging ports are there in Vietnam?

The company has deployed over 150,000 charging ports nationwide, especially in 63 provinces and along 125 national highways and expressways. Since 2024, this network has been transferred to its subsidiary, V-Green, aiming to become Vietnam's "EVGO," specializing in professional and independent charging network operations and expansion.

Lead the charge with QuangAnhcons' fast EV charging station installation services. From planning to execution, we provide advanced solutions for rapid and reliable EV charging infrastructure.

The 4th generation Enphase IQ Battery 10C is an all-in-one AC-coupled 10 kWh battery storage system with
