What is a 19 inch rack cabinet?

19" rack cabinets come in different heights and depths, measured in rack units (U), where 1U equals 1.75 inches of vertical space. Common sizes include 12U, 24U, and 42U cabinets, with 42U being a popular choice for data centers and server rooms. The 19" rack cabinet is designed to support a safe, organized, and efficient IT infrastructure.

What are the benefits of 19 inch rack cabinets?

Efficient Space Utilization: 19" rack cabinets maximize space by stacking devices vertically, making it easier to manage equipment in compact environments. Improved Security: With lockable doors and sturdy construction, these cabinets offer protection against unauthorized access and potential theft.

What are server cabinets used for?

Our server cabinets have been used widely for the safe and secure storage of servers and other types of networking equipment. Due to the internationally accepted 19" mounting width norm, almost all kinds of rack mounted networking, sensing, power, instrumentation, or monitoring equipment can be easily installed and housed in a server rack.
