Easily upgradable from 500kW to 1MW of energy storage, storing up to 3.8MWh of energy, enough to power an average 3,600 homes for one hour.

The equipment can automatically charge the storage batteries using valley-time urban electricity with a low cost and can be set to the long-time ...

The equipment can automatically charge the storage batteries using valley-time urban electricity with a low cost and can be set to the long-time status of interruptible power supply.

Turnkey Solutions: From design to commissioning, all in 3-5 days. Global Certifications: EN50549, IEC62619, CE compliant. *All specifications ...

Turnkey Solutions: From design to commissioning, all in 3-5 days. Global Certifications: EN50549, IEC62619, CE compliant. *All specifications subject to technical customization.

Our mid-node 500 kW/250 kWh Battery Energy Storage Systems (BESS) are designed to satisfy a variety of on and off-grid applications, enabling reduced emissions and costs.

Our containerised energy storage system (BESS) is the perfect solution for large-scale energy storage projects. The energy storage containers can be used in the integration of various ...

The customised BESS solution can be integrated with energy generated by renewable sources, encompassing Digital Technology and Application Programs and can be used for applications ...

This is a 500KW small-scale commercial and industrial energy storage system. It can store electricity through

photovoltaic, diesel generators, ...

When the BESS is not in operation for an extended period, it is recommended for the BESS operator to store the battery in a cool and ventilated environment, and to recharge and ...

The customised BESS solution can be integrated with energy generated by renewable sources, encompassing Digital Technology and Application Programs and can be used for applications ...

Equipped with function control software, it can control the main operation parameter settings on the remote PC machine, and realize the energy flow between the battery and the power grid in ...

Our containerised energy storage system (BESS) is the perfect solution for large-scale energy storage projects. The energy storage containers can be used in the integration of various ...

This is a 500KW small-scale commercial and industrial energy storage system. It can store electricity through photovoltaic, diesel generators, and other means, with off-grid design.

Battery Systems come with 5000 cycle warranty and up to 80% DOD (Depth of Discharge) @ 0.5 at 25°. These AC coupled systems offer commercial customers turn key energy storage ...
