-----

The battery storage sector still faces challenges. Other types of batteries that might potentially store energy for longer could make some projects relying on today's lithium-ion ...

The Department of Energy (DOE) Loan Programs Office (LPO) is working to support deployment of energy storage solutions in the United States to facilitate the transition to a clean energy ...

The case dates back to May 2021, when developer Kyon Energy submitted a grid connection request for a standalone energy ...

This page summarizes information in the Inflation Reduction Act related to renewable energy project tax provisions. While EPA does have some Inflation Reduction Act ...

A renewable portfolio standard (RPS) typically requires that a percentage of the electric power sales in a state comes from renewable energy sources. Some states have ...

The push for clean energy in India has never been stronger. With rising electricity bills, climate concerns, and increasing awareness ...

The nearly 900-page bill that President Donald Trump signed on July 4, 2025, slashes incentives for wind and ...

Until battery prices fall, energy markets mature, and currently non-monetizable energy storage services become monetizable, state incentives will be a necessary and critical key to ...

Several renewable energy projects like solar, wind, green hydrogen, and energy storage projects are witnessing

growth supported by DOE energy subsidies. Thus, let the subsidies pay, ...

Discover Innotinum, a leading battery energy storage system manufacturer, offering cutting-edge all-in-one energy storage systems. Our advanced battery energy storage ...

According to Sumitomo Electric, it will be the first redox flow battery project to receive support through a government subsidy ...

Battery storage incentives typically fall into two main categories: upfront incentives and performance-based incentives. Upfront incentives provide direct financial support at the ...

The application for the sixth phase of Poland's "My Electricity" rebate program began earlier this month, offering a total ...

In this study, we examine the impact and mechanisms of government subsidies on the competitiveness of ESEs, using panel data from 248 listed ESEs in China between 2014 ...

In China, C& I energy storage was not discussed as much as energy storage on the generation side due to its limited profitability, given cheaper electricity and a small peak-to ...

Concerns about the availability and cost of energy and about environmental impacts of fossil energy use have led to a wide variety of federal incentives for renewable energy and energy ...

The ability to store electricity that is produced by renewable energy projects is crucial to maximising efficient energy use and securing the UK's energy supply in the face of ...

According to Sumitomo Electric, it will be the first redox flow battery project to receive support through a government subsidy programme for large-scale energy storage, run ...
