-----

Giving people better data about their energy use, plus some coaching, can help them substantially reduce their consumption and costs, according to a study by MIT ...

The revenue potential of energy storage technologies is often undervalued. Investors could adjust their evaluation approach to get a ...

Permitting Utility-Scale Battery Energy Storage Projects: Lessons From California By David J. Lazerwitz and Linda Sobczynski The increasing mandates and incentives for the rapid ...

Unlocking its secrets could thus enable advances in efficient energy production, electronics cooling, water desalination, medical diagnostics, and more. "Boiling is important for ...

Key diligence areas when considering energy storage projects include evaluating the battery technology as well as the supplier and country of origin of the batteries and other ...

Energy storage is transforming the energy sector through its ability to support renewable energy and reduce grid reliance on carbon-intensive resources. By storing excess energy during ...

MIT engineers developed a membrane that filters the components of crude oil by their molecular size, an advance that could dramatically reduce the amount of energy needed ...

Find out more about the key changes to clean energy incentives including accelerated sunseting of various popular tax credits.

North America"s most-active energy investors are a mixed bag of US infrastructure-focused PE firms and

global alternative investing giants.

Energy Impact Partners LP (EIP) is a global energy investor with a proprietary model designed to drive innovation. EIP brings together ...

The event was held at Bubuk substation, the connection point for the final project to be completed in a portfolio comprising BESS ...

In MIT course 15.366 (Climate and Energy Ventures) student teams select a technology and determine the best path for its commercialization in the energy sector.

General Electric's energy business corporate VC backing grid infrastructure and energy storage technologies. Guide to 20 energy storage investors including Breakthrough ...

Liquid air energy storage could be the lowest-cost solution for ensuring a reliable power supply on a future grid dominated by carbon-free yet intermittent energy sources, ...

The new Schmidt Laboratory for Materials in Nuclear Technologies (LMNT) at the MIT Plasma Science and Fusion Center accelerates fusion materials testing using cyclotron ...

The partnership-flip structure is expected to continue to be employed by the majority of tax equity investors for standalone battery storage projects, ...

Investor Rankings are calculated using our Seedtable Score - a 1 to 100 score that uses quantitative and qualitative data points (like the size of their fund or the quality of the ...

The CEIC for energy storage has the benefit of the same deferred phase down, even in the case of batteries co-located with solar or wind projects, which should permit ...
