---

The European Commission says it will introduce an energy storage package in 2025, as outlined in a new report on progress by ...

These projects are essential components of a broader strategy aimed at integrating fluctuating renewable energy sources into the grid. By enabling the optimization of energy ...

New analysis reveals another year of record installations for European battery storage, despite slower year-on-year growth, according to the latest European Market Outlook ...

A new interactive platform--the European Energy Storage Inventory --has been launched to provide near real-time insights into energy storage deployment across the EU, ...

Under the EU"s flagship research programs, Horizon Europe and Horizon 2020, numerous energy storage projects are being funded to develop innovative, scalable storage solutions.

Without long-lasting and widely available storage, Europe will struggle to solve its energy price conundrum.

2025 will be the first time in over a decade that solar power additions decline in the EU, largely due to waning rooftop installations.

The goal is to list all planned and operational energy storage projects in Europe by location and technology. The dashboard can be ...

The goal is to list all planned and operational energy storage projects in Europe by location and technology. The dashboard can be filtered by country, project status and technology.

The utility-scale solar market remains relatively resilient, driven by auctions across Europe that incentivise flexible solar projects that are combined with storage or wind. ...

The EU has launched a grant funding opportunity worth EUR4 billion for upstream and downstream clean energy projects, including ...

These projects are essential components of a broader strategy aimed at integrating fluctuating renewable energy sources into the grid. ...

"With energy storage, there"s a new and interesting asset class emerging, and the business model is fundamentally different to that of ...

The European Energy Storage Inventory, developed by the Joint Research Centre (JRC) of the European Commission, is a new interactive platform that maps and analyzes over 1771 energy ...

SolarPower Europe marks its 40th anniversary with a new tagline "SolarPower Europe: Solar, Storage, and Flexibility" and plans to establish a dedicated European battery ...

There is a "healthy pipeline of projects in development" across Europe"s energy storage sector, but the technologies are as yet "significantly underutilised" below their potential.

The program supports hybrid projects, which combine storage with renewable energy, such as solar or wind farms. Spain"s electricity ...

New analysis reveals another year of record installations for European battery storage, despite slower year-on-year growth, according ...
