**How much does a solar system cost in Georgia?**

The Residential Clean Energy Credit,formerly known as the federal investment tax credit (ITC),can reduce your solar panel system's cost by 30%. Your entire system,including all the equipment,labor,permitting, and sales tax,qualifies for the ITC. In Georgia,the average cost for a 5 kW solar panel system is around \$13,160.

**How much does a solar system cost?**

The solar industry doesn't have a standard pricing structure,so the cost to the customer is based on their energy consumption. The cost of a solar system installation can vary widely when you compare the efficiency rate of the solar panels and other installation expenses. The best solar panels can set you back anywhere from \$15,000 to \$50,000.

**How much does a solar battery cost?**

They store the energy accumulated from the solar panels. The price varies based on the installer,application and location. Batteries typically cost \$12,000 to \$22,000,according to the Department of Energy,although smaller capacity systems are available for less. In some cases,solar batteries may be more expensive than solar panels.

**Are solar installations cheap?**

Solar installations aren't cheap,but the actual equipment is a relatively small part of the total cost. It's only 35% of your total installation cost,according to the US Department of Energy. Soft costs,also known as the hidden costs of installing solar,are nonhardware costs, and they make up 65% of your total solar costs,according to the DOE.
