Which 5G routers are available in Germany?

When the initial version of Siemens' private 5G infrastructure was launched in 2023, it was exclusively available in Germany. To complement the infrastructure expansion, Siemens is also introducing the new compact Scalance MUB852-1, an entry-level 5G router for cabinet use with IP20 protection class, part of the Siemens Xcelerator portfolio.

How many radio units can a 5G network support?

The expanded solution now supports up to 24 radio units, with each unit capable of covering approximately 5,000 m². The updated private 5G infrastructure is now available in multiple countries including Germany, Sweden, Netherlands, Switzerland, Denmark, Austria, and Brazil, and there are plans to expand to additional countries throughout 2025.

What is Siemens' new 5G infrastructure solution?

The technology company Siemens announced a significant update to its industrial-grade private 5G infrastructure solution, that will enable manufacturers to cover larger industrial areas with enhanced connectivity capabilities. The expanded solution now supports up to 24 radio units, with each unit capable of covering approximately 5,000 m².

What is a 5G network & how does it work?

Private 5G networks also create the flexible communication infrastructure needed to easily integrate smart sensors and edge devices, enabling data-driven decisions on the shop floor through artificial intelligence applications.

The German 5G Base Station Equipment Market operates at the convergence of aggressive MNO-led network expansion and a structurally unique regulatory environment that prioritizes ...
