How does ATs perform helium leak detection services?

ATS performs helium leak detection services using test methods that allow us to locate and measure small leaks in client sample components. At Applied Technical Services (ATS) our experts provide helium leak detection services for companies in various industries.

What is helium leak testing?

Battery: In the energy industry, helium leak testing is used to test the integrity of the battery pack, battery housing, and even pouches and cells to prevent leaks and ensure safety. **Military:** In military applications, helium leak testing is vital for ensuring the reliability of weapons systems, communication equipment, and vehicles.

Does ATs perform helium mass spectrometer leak detection (hmsld) testing?

ATS also has the capabilities to perform helium mass spectrometer leak detection (HMSLD) testing in the field. Our extensive experience in Helium Leak testing is frequently requested by many industries, including Nuclear, Power Generation, Chemical, Automotive, Aerospace, and Oil and Gas.

How does a helium leak detection unit work?

When using the vacuum testing method, the helium leak detection unit will first create a vacuum in the product that is being tested. Once the welded area has been evacuated, the joints (or weldments) are sprayed with helium. If helium is detected on the outside of the product, the unit will alert you to the area of the leak.

Leak testing is a fundamental operation in the battery cell production process, in particular for the new generations of lithium-ion secondary batteries. The perfect sealing of the housing is one ...

leaks in client sample components.

The helium inspection process acts as a sophisticated early warning system, capable of detecting even the minutest leaks accurately and promptly, ...

Outdoor battery cabinet protects contents from harmful outdoor elements such as rain, snow, dust, external heat, etc. Plus, it provides protection to ...

Historical Data and Forecast of Mauritius Battery Testing and Inspection Equipment Market Revenues & Volume By Stationary Battery Testing for the Period 2020- 2030

Outdoor cabinets ensure network stability and protect communication equipment with reliable power management.

Axenics specializes in helium leak testing. We are certified to perform vacuum and pressure testing on a full range of metal and plastic materials.

EPIC Series Battery Cabinet Battery cabinets for indoor and outdoor applications HindlePower's Battery Cabinet is designed to maximize DC system performance and battery life, saving YOU ...

3. Batteries Function: Batteries provide backup power in case of a power outage, ensuring uninterrupted operation of the communication equipment. Inspection and Maintenance: ...

We'll delve into its methods, why helium is the preferred gas for this type of testing, how to perform a helium leak test, its advantages, and its diverse applications.

By following a comprehensive inspection and maintenance routine, including air conditioning units, power supplies, and batteries, you can prevent ...

By following a comprehensive inspection and maintenance routine, including air conditioning units, power supplies, and batteries, you can prevent costly downtime and maintain the ...

The helium inspection process acts as a sophisticated early warning system, capable of detecting even the minutest leaks accurately and promptly, thereby providing an unyielding assurance of ...

Protect your outdoor battery cabinet in extreme weather with tips on thermal management, waterproofing, cleaning, and structural ...
