-----  
How many green hydrogen projects are there in Brazil?

From pv magazine Brazil A mapping conducted by H2 Brazil, a project resulting from a partnership between the German Agency for International Cooperation (GIZ) and the Brazilian Ministry of Mines and Energy, has identified at least 42 green hydrogen production projects in the country of different sizes and stages of development.

Why is green hydrogen important in Brazil?

The production of green hydrogen is seen as a way to tap Brazil's enormous potential for renewable generation. Just from projects under development, there are 99 GW of solar energy and 25 GW of wind energy capacity. Electricity corresponds to 73% of the production cost of green hydrogen.

How much does green hydrogen cost in Brazil?

For the green hydrogen produced in Brazil to become competitive, the price level for renewable energy in the country should decrease to between \$10/MWh and \$30/MWh (BRL 149/MWh), according to estimates presented at the Intersolar Summit Nordeste.

How much green hydrogen will Brazil export by 2040?

By 2040, exports could reach USD 4-6 billion, or 2-4 million tonnes of green hydrogen (3). The domestic market is the largest opportunity for Brazil, and by 2040 can reach USD 10-12 billion, driven mostly by trucking, green steel, and other industrial energy uses.

The stations spread across Brazil will help spread hydrogen power to consumers and lower the price of fuel cell cars. Approved by the National Energy Policy Council (CNPE) ...

LBST has operated the database h2stations since 2005, offering the most comprehensive information on hydrogen refuelling stations worldwide. Data is collected and ...
