**How do I size my campervan or RV solar setup?**

Use this solar calculator to size your campervan or RV camper solar setup. If your device doesn't specify watts, use the watt calculator to convert amps and volts. List each device - every electrical component - its usage in watts, maximum number of hours used each day & if it's an AC or DC model.

**What is the RV solar calculator?**

The RV solar calculator provides the minimum size solar components needed based on the information entered. How do I know all the electrical devices I'll use? Getting a complete list of electrical appliances, devices and components you'll use in your RV is the most critical part of sizing the electrical system.

**How do I find the wattage of a solar system?**

The watts of most devices can be found either printed on the device, in the operating manual or the manufacturer's website online. Sometimes, products list the power usage in current (i.e. amps). In this case, use the wattage calculator at the top of the solar calculator above to convert the current and volts to watts.

**How do I choose a camper solar panel?**

Choose the size closest to your solar panel set up. Each has a complete list of the components needed. Choose your solar panels. There's a number of different types and you can read more about them in our camper solar panels post. Once you've selected the type of panel, measure the available space on the roof so you know what sizes to buy.

The amperage requirements of a cabinet power supply can vary significantly depending on the type of equipment and its power ...

Hence, I implore that we provide an RV electrical panel with a 200 amp breaker, with 60 and 100 amps being other possible choices, depending on how much energy you use.
