---

India's solar manufacturing is set to outpace demand, with module and cell capacities projected to hit 200 GW and 100 GW by FY28, driving exports and easing costs ...

India's solar cell and module manufacturing capacity is expanding at an exponential rate. Almost all leading domestic solar equipment manufacturers--including Waaree Energies, ...

India added 25.3 gigawatts (GW) of solar module manufacturing capacity and 11.6 GW of solar cell capacity in calendar year 2024, according to Mercom India's latest report on ...

Check out Sinovoltaics India Solar Supply Chain Map, which includes capacities for modules, cells, wafers, ingots, and polysilicon.

Considering the current growth trajectory and ongoing supportive measures, the report projects India's cumulative installed solar PV capacity to reach between 280 GW and ...

India's solar cell manufacturing capacity is set to touch 50-55 GW by fiscal 2027, up five-fold from 10 GW at the end of fiscal 2024, says a new report by Crisil Ratings.

Contrasting the maturity in modules, solar cell capacity in India is just 26 GW DC - less than one-third of module capacity - ...

As India advances toward its Vision 2047 goals, solar module and cell manufacturing must be at the heart of the renewable energy ...

India added 44.2 gigawatts (GW) of solar modules and 7.5 GW of solar cell manufacturing capacity in the first half (1H) of 2025, ...

India's solar cell and module exports surged by 65.2% year-on-year in Q3 2025, reaching \$344.5 million, with Gujarat contributing significantly to manufacturing capacity. A ...

India's solar manufacturing sector is poised for substantial growth, with a new report from SolarPower Europe and the National Solar Energy Federation of India (NSEFI) ...

Recently, India's Ministry of New and Renewable Energy (MNRE) announced the addition of 23,119 MW of solar module production capacity to the Approved List of Models and ...

India is advancing towards self-reliance in solar cell and module manufacturing, with import reductions and domestic capacity ...

India added 44.2 gigawatts (GW) of solar modules and 7.5 GW of solar cell manufacturing capacity in the first half (1H) of 2025, according to the recently released report ...

The Indian solar industry has 86GW and 182GW of solar cell and module manufacturing capacity, respectively, expected to be commissioned by 2027.

India has nearly trebled its annual nameplate for solar cells from 9GW to 25GW between March 2024 and March 2025, according to ...

In solar cells, Tamil Nadu held 12% of the capacity, while Karnataka, with 18%, ranked second. Despite adding 11.6 GW of annual ...

By the middle of 2025, the solar module manufacturing capacity in India was around 120 GW, and the operational solar cell capacity was nearly 29.3 GW (IIEFA, 2025). ...
