Where do I install a line-up and match Battery Cabinet?

Line-up-and-match battery cabinets are installed adjacent to the UPS. The recommended installation location is on the right side of the UPS cabinet as viewed from the front of the cabinet. See Figure 3 for line-up-and-match configuration views. Figure 3. Eaton 93PM 100 kW UPS and Two 93PM Integrated Battery Cabinets

How many 93pm battery cabinets can a UPS system use?

The UPS system has been evaluated for use with a maximum of four 93PM Battery Cabinets. Use of any other configuration may result in fire, death, and voiding of the warranty. Disconnect the charging source prior to connecting or disconnecting battery terminals. Determine if the battery is inadvertently grounded.

How do I use Sol-Ark 15K / limited load / self-Consumption?

On the Sol-Ark 15K. Limited Load / Self Consumption Sol-Ark will only power loads connected to it. It will not produce more power than the connected loads require. To simultaneously select Grid Sell and Limited to HomeLoad (light bulb) icon on the home screen now includes both

How do I connect an IBC to a UPS cabinet?

IBCs can be installed in a line-up-and-match configuration with the interface wiring routed through the IBCs and UPS cabinet or in a standalone configuration with the interface wiring routed between the IBCs and the UPS cabinet using conduit. Disconnect terminal block plug from terminal block to wire plug.
