What is Spark data centre?

With advanced security, seismic protection and state-of-the-art sustainability, the Spark Data Centre is helping New Zealand businesses manage their technology assets today and drive the country's digital transformation. As demand for data grows, Spark is ready to scale up.

How many racks does Spark have in New Zealand?

The flexible facility accommodates four 100-rack data halls today with capacity equivalent to 640,000 servers - or enough processing power for every New Zealander to host 10 websites. And with a modular design that supports fast construction, Spark can increase its capacity to 1,200 racks as it meets the demands of New Zealand's digital future.

Is AI facilitating data centre demand in New Zealand?

NZTE has again partnered with Analysys Mason to conduct a study to assess the implications of AI towards data centre demand and the potential role of New Zealand in facilitating this. This study builds on a report NZTE previously commissioned covering the potential for green DCs in New Zealand back in 2022, the report is available [here](#).
