The 120 MW Aftab Sharq solar plant in Isfahan, a EUR305 million project set to expand to 600 MW, advances Iran's renewable capacity goals amid Western sanctions.

Discover how Iran's new 500 MW solar-hydro power plant is revolutionizing its energy sector, tackling environmental issues, and ...

Iran's embrace of solar power within heavy industries like steel manufacturing reflects a strategic adaptation to enduring sanctions and ...

The Tehran project is one of 1,000 distributed solar plants planned under Iran's national 3,000-megawatt renewable energy initiative. The projects are being executed as ...

The CEO of Bushehr Provincial Electricity Distribution Company announced the start of implementing a 200 MW solar power plant with a huge investment of over \$70 million from ...

The Eastern Sun Solar Power Plant, Iran's largest solar project (central Iran), was recently inaugurated in Isfahan province and is considered a milestone on the country's path ...

Iran has set a new national record in solar energy generation, achieving an unprecedented 800 MW of instantaneous output from solar power plants across 24 sites in ...

Developed by MAPNA Group specialists, the plant is located 45 kilometers from Isfahan and covers an expansive 1,200-hectare area. ...

Iran's largest solar power plant was officially inaugurated in Kuhpayeh, Isfahan, during an online ceremony attended by President Massoud Pezeshkian and senior officials on ...

Designed to expand to 600 MW by March 2027, Aftab Sharq will become Iran's largest solar facility upon completion. The remaining ...

Solar power growth accelerates in Iran as 250 MW of new capacity launches, 450 MW begins construction, and a 30 GW target is set for 2028.

Iran takes a significant leap in its renewable energy drive, inaugurating its largest solar power plant to date in Isfahan Province.

Iran is taking a significant step forward in renewable energy with an ambitious plan to develop 15GW of new solar capacity by 2030. This initiative, which centers on solar ...

Developed by MAPNA Group specialists, the plant is located 45 kilometers from Isfahan and covers an expansive 1,200-hectare area. According to project officials, this first ...

The Tehran project is one of 1,000 distributed solar plants planned under Iran's national 3,000-megawatt renewable energy ...

Iran has taken a significant leap in its renewable energy drive, inaugurating its largest solar power plant to date in Isfahan Province. The newly inaugurated solar plant stands as a testament to ...

Iran's largest solar power plant was officially inaugurated in Kuhpayeh, Isfahan, during an online ceremony attended by President ...

This target reflects Iran's long-term vision for a more sustainable and environmentally friendly energy system. The inauguration ...
