The new energy sector is buzzing with innovations where companies are squeezing more power into smaller spaces, like trying to fit a lightning bolt into a lunchbox. With the global energy ...

BEIJING, Jan. 24 (Xinhua) -- China's new energy storage sector has seen a rapid growth in 2024, with installed capacity surpassing 70 million kilowatts, said an official with the National Energy ...

We need to think more deeply about thermal energy storage as a pathway to industrial decarbonisation and managing electricity costs, writes Pasquale Romano, CEO of Redoxblox.

The hope is that new energy storage solutions can help China increase efficiency in its renewables sector, allowing it to transition away from fossil fuels without making the ...

As the global energy transition reaches a critical juncture, the energy storage industry is emerging as a new frontier that attracts significant capital investment.

The energy storage sector maintained its upward trajectory in 2024, with estimates indicating that global energy storage installations rose by more than 75%, measured by megawatt-hours ...

In the United States, the energy storage market experienced unprecedented growth in 2024, adding 3.8 GW in the third quarter alone. This momentum is expected to continue, ...

Energy storage is a potential substitute for, or complement to, almost every aspect of a power system, including generation, transmission, and demand flexibility.

The ACP has committed to investing \$100 billion over the next five years to build and buy American-made battery storage.

The conference will serve as a platform for stakeholders to share insights and collaborate on innovative solutions in the new energy ...

Energy storage creates a buffer in the power system that can absorb any excess energy in periods when renewables produce more than is required. This stored energy is then ...

Discover the Top 10 Energy Storage Trends plus 20 out of 3400+ startups in the field and learn how they impact your business.

Deloitte's 2026 Renewable Energy Industry Outlook indicates that amid policy changes, the industry is likely to focus on building resilience

The conference will serve as a platform for stakeholders to share insights and collaborate on innovative solutions in the new energy landscape. Overall, the integration of ...

The new-type energy storage sector is in a stage of rapid development, and technological innovation is the key to driving progress ...

China's energy storage sector is rapidly expanding. As a solution to balancing the country's growing energy needs and mass ...

As China achieves scaled development in the green energy sector, "new energy" remains a key topic at 2025 Two Sessions, China's ...

China's industrial and commercial energy storage is poised for robust growth after showing great market potential in 2023, yet critical ...
