Do you need a charging station in a built-in cabinet?

Keep in mind, a handy charging station doesn't always have to be part of a built-in cabinet. A freestanding hutch or cabinet can be a great place to add a charging station without having to retrofit any existing cabinets. Your turn: Got a smart solution for charging your devices?

What is the difference between a split-type and integrated charger?

Split-Type chargers offer modularity, scalability, and easy maintenance, making them ideal for high-density applications and high-traffic charging stations. On the other hand, Integrated chargers are cost-effective, easy to install, and perfect for smaller or standalone locations with lower charging demand.

Why should you choose a modular DC fast charger?

The modular design can also reduce replacement expenses if only the dispensers require upgrading or servicing. Integrated DC Fast Charger: Integrated chargers are often more cost-effective upfront, as they have a simpler, all-in-one structure. Installation is straightforward and less labor-intensive, which can lower the initial investment.
