Hydrogen energy storage (HES) is vital for ensuring the rapid development of renewable energy due to its long duration, high energy density and flexible deployment. ...

A boom in battery storage has bolstered the demand outlook for lithium in 2026, driving hopes for an accelerated turnaround for an industry struggling with oversupply.

US energy storage set a Q1 record in 2025 with 2 GW added, but looming policy changes could put that growth at serious risk.

In this Energy-Storage.news roundup, Hydrostor receives permitting approval for its California project, Hawaiian Electric is set to begin construction on ...

Global demand for energy storage is surging. Lithium-ion leads today, but new contenders like sodium-ion, flow, and gravity systems are shaping the future grid.

We already have one kind of renewable energy storage: more than ninety per cent of the world's energy-storage capacity is in reservoirs, as part of a remarkable but unsung ...

Together, these factors created a whole new businesses for power companies, spawned new grid battery companies, and fertilized ...

While early adopters continue leading in deployment, activity across the country shows clear demand for utility-scale energy storage as a solution to rising electricity prices and ...

Breakthroughs in battery technology are transforming the global energy landscape, fueling the transition to clean energy and reshaping industries from transportation to utilities.

With these reforms, energy storage can scale to meet the moment: strengthening the grid, lowering costs and securing America's energy future. These steps are not optional--they ...

Energy storage offers many benefits, but it also is complicated by supply chain challenges that affect how technologies are developed and used. Over the last few decades, ...

A new long duration energy storage system that deploys molten tin for heat transfer has received \$20 million in Series A Plus funding.

The European Commission has officially launched the European Energy Storage Inventory, a real-time dashboard for energy storage. The goal is to list all planned and ...

Energy storage can make money right now. Finding the opportunities requires digging into real-world data.

An energy storage technology developed in the 1970's is rising up to haunt the fossil fuel industry. Details: <https://cleantechnica>.

We already have one kind of renewable energy storage: more than ninety per cent of the world's energy-storage capacity is in ...

The New Energy Outlook presents BloombergNEF's long-term energy and climate scenarios for the transition to a low-carbon economy. Anchored in ...

Whether for solar inverters, EV charging systems, or energy storage, Unicreed designs and manufactures custom transformers that match the unique demands of new energy applications.
