How can Kosovo improve its energy sector?

The Government of Kosovo aims to put its energy sector on a sustainable path, through developing renewable energy potential, improving energy efficiency, closing a 50-year-old power plant, and rehabilitating another old power plant.

Does Kosovo have solar power?

Kosovo has the potential of capturing solar energy directly and converting it to electricity. The region of highest solar potential based on global horizontal irradiation is the southwestern part of Kosovo, centred around the city of Gjakova. Solar power is already used on the roofs of some buildings.

What is the energy storage project?

The Energy Storage Project aims to support Kosovo's energy security and transition to a cleaner energy future.

How did Kosovo get its own energy system?

Kosovo was part of the Regional Energy Community and was connected with the regional system through interconnections with Serbia, North Macedonia, Montenegro and Albania. KOSTT made an agreement with ENTSO-Eso. Kosovo gets its own independent region of energy administration. Kosovo gets full independence and control of its energy industry.

The realization of two huge solar district heating projects in the Balkans is progressing. The pre-qualification tender for a 44 MW collector field with ...

Kosovo has taken a significant step toward strengthening its energy security and expanding its renewable capacity. According to local ...

The Kosovo Compact includes an Energy Storage project and a Just and Equitable Transition Acceleration project. In addition, the compact seeks to promote additional private-sector ...

The Energy Storage Project: Two lithium-ion Battery Energy Storage Systems (BESS): o 45MW (90MWh) procured as a design-build for KOSTT (Kosovo TSO and Market ...

The Government of Kosovo is committed to decarbonizing the electricity sector, as shown by their national energy policy, recent Solar PV Auction, and planned Wind Auction

Qiketai CSP Energy Storage Project The 100-MW CSP project, featuring 12 hours of molten salt energy storage, uses the tower molten salt energy storage CSP technology independently ...

The MCC-Kosovo Compact seeks to introduce a state-of-the-art energy storage system, laying the foundation for reliable, renewable energy sources to be integrated into Kosovo'''s grid and ...

Discover how Unisolar's landmark 7.4 MW solar project at the historic Trepça mining complex is accelerating Kosovo's transition to renewable energy and independence.

Kosovo electricity production comes from two lignite'''s fired power plants, Kosovo A and Kosovo B. Kosovo A was built during the 1960s with Soviet technology, while Kosovo B was built ...

Swiss firm Orllati and its consortium won the first solar power auction in Kosovo*. They can build and operate a PV park of up to 105 MW.

Discover how Unisolar's landmark 7.4 MW solar project at the historic Trepça mining complex is accelerating Kosovo's transition to ...

Botswana Solar Energy Storage Battery Project The World Bank has approved funding for Botswana's first grid-side battery energy storage system (BESS), which will have an output of ...

The Kosovo Compact aims to support Kosovo's energy security and transition to a more sustainable energy future, increase education and employment opportunities in relevant ...

GHG 13% by 2030, 55%-69% by 2050. The Energy Storage Project aims to support Kosovo'''s energy security and tra. sition to a cleaner energy future. The project includes supporting ...

A photovoltaic energy storage project so efficient it could power 15,000 homes while making traditional power plants blush. That's exactly what Kosovo's Pristina Photovoltaic Energy ...

The project is an important milestone for the transition of the energy supply in the Western Balkan countries towards a sustainable electricity supply. This is the first large-scale ...

A flurry of grid-scale energy storage news from Europe, with large-scale projects progressed in Kosovo, Switzerland and Croatia.

But here's the kicker - without proper energy storage systems, those shiny new solar panels can't really change the game. Let's unpack what's happening and who's stepping up to fix it....
