-----

Philippines president Ferdinand Marcos Jr at the project's groundbreaking, 21 November. Image: Presidential Communications ...

A large-scale solar and battery energy storage project in the Philippines is moving forward faster than expected, with 54% of the first phase completed just eight months after ...

The power generation arm of the Philippines' largest private electric distribution provider, Manila Electric Company (Meralco), is ...

A large-scale battery storage project in the Philippines. GEA-3 concluded with 7,500MW of offered capacity being awarded to non-feed ...

The Philippines is taking a decisive step toward firm renewable energy capacity, with the latest round of its Green Energy Auction (GEA-4) marking the country's most storage ...

Sungrow commissions the Philippines' first large-scale solar-plus-storage plant, advancing the nation's clean energy future.

The Philippines government has granted a "green lane certificate" to the Terra Solar Philippines for its solar project with a 4,500 ...

ACEN is revolutionizing energy solutions in the Philippines with cutting-edge battery storage projects. These initiatives are tailored to enhance grid reliability, allowing for smoother ...

The Kabankalan battery is the first utility scale project controlled by a grid operator in the Philippines and the

first operational ...

Rapid growth of electric vehicles and charging infrastructure is accelerating the adoption of advanced battery technologies. Utilities across Philippines are investing heavily in ...

By 2025, energy storage demand in the Philippines is projected to exceed 9,700 MWh. In response, Chinese companies are actively promoting lithium-ion batteries and smart microgrid ...

In the Philippines, battery energy storage systems are still in their nascent stages. While policies like the inclusion of Integrated Renewable Energy and Energy Storage Systems ...

Image: ABB. The Philippines has turned its focus onto transitioning its energy sector to larger shares of renewable energy. ...

With EverCore, SolisStorage is changing that narrative by offering a system specifically engineered to be simple, smart and dependable for large-scale applications. The ...

A large-scale battery storage facility providing ancillary services to the grid has gone into commercial operation at the site of a ...

Battery Energy Storage Systems (BESS) are transforming the energy game for both the commercial and industrial (C& I) sectors and large-scale ...

The power generation arm of the Philippines' largest private electric distribution provider, Manila Electric Company (Meralco), is developing its second large-scale battery ...

They can last a really long time and are good for large-scale energy storage projects. Unlike lithium-ion batteries, flow batteries store energy in liquid electrolytes, which ...
