Will Panama be a model for energy storage in Central America?

Panama made history with its 2024 tender for 500 MW of renewables plus storage, aiming for 120-150 MW of BESS deployment. This represents the first market-based approach to energy storage in Central America, potentially serving as a model for the region.

Who invests in energy storage in Chile?

The utility scale segment dominates Chile's energy storage landscape. Large power generation companies are the primary investors in BESS, usually pairing them with renewable plants. Key players include Engie, AES Andes (AES), Enel, and Colbún, who are deploying batteries to provide firm capacity and ancillary services.

Is Colombia launching a solar storage tender?

Colombia's Ministry of Energy and Mines is considering launching tenders for storage co-located with solar and wind farms in La Guajira, a region with high renewable resource potential but weak grid infrastructure. Argentina entered the BESS race with the "Alma GBA" tender for 500 MW of storage, launched in early 2025 and worth \$500 million.

Who are the 'customers' for battery storage in Chile?

Thus, the largest "customers" for storage in Chile will continue to be grid operators and utilities procuring batteries to smooth renewable generation and defer transmission upgrades, as well as renewable developers adding batteries to earn capacity payments and reduce curtailment of their projects.

The Australian Energy Regulator (AER) has confirmed that 244 community battery energy storage systems (BESS) are now connected to ...

This article presents an overview of the photovoltaic solar energy integration in the South American energy
