How is energy used in Bosnia and Herzegovina?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

Should Bosnia & Herzegovina cap energy consumption?

To boost energy efficiency and energy savings, it also needs to cap primary energy consumption at 6.5 Mtoe and final energy consumption at 4.34 Mtoe by 2030. In mid-2023 Bosnia and Herzegovina published a draft National Energy and Climate Plan.

Is Bosnia and Herzegovina a net exporter of electricity?

Bosnia and Herzegovina (BiH), a country of around 3.5 million people, is currently a net exporter of electricity - the only one in the Western Balkans. More than half of its electricity generation capacity is made up of hydropower, while the remainder is made up of five lignite power plants.

Does Bosnia & Herzegovina use fossil gas?

Bosnia and Herzegovina does not have its own fossil gas extraction and has a very low level of gas dependence - less than 3 per cent of total energy supply in 2022. In the Federation of BiH entity, it is mostly used for heating in Sarajevo.

Bosnia & Herzegovina's electricity mix includes 61% Coal, 35% Hydropower and 3% Wind. Low-carbon generation peaked in 2023.

In terms of the development of geothermal energy in Bosnia and Herzegovina, two major projects were carried out in Bosnia and Herzegovina by the GEOTest, a.s. and ...

The revenue generated in the Refrigerators market in Bosnia and Herzegovina is projected to reach

US\$14.85m in 2025. This market is anticipated to experience an annual growth rate of ...
