What solar projects are being built in the Philippines?

Vena Energy, another big developer, completed the 132 MW Cadiz project in Western Visayas in 2016, and the 83 MW Ilocos Norte Solar PV project in Ilocos in 2023. In August 2024, Vena announced that it would build the 550 MW Bugallon solar project with an unspecified amount of battery energy storage in Bugallon, on Luzon, by the end of 2025.

How have reforms impacted solar projects in the Philippines?

Reforms over the past three years have lifted restrictions on foreign investment and sped up the permitting process for solar projects in the Philippines. As the government banks on renewables to drive the rapid expansion of power production, challenges remain for local project developers. Neil Ford reports.

How much does solar cost in the Philippines?

In March 2024, Philippines company ACEN and US-based business BrightNight announced plans for 1 GW of solar and other renewables across the country, at a cost of \$1.2 billion.

Is the Philippines showing real purpose on the energy transition?

"The Philippines is showing real purpose on the energy transition and no project represents this more than the Terra Solar project," he said, revealing it will co-locate solar with battery storage on a scale the region hasn't seen before, backed by a "sizable PPA", to deliver a stable renewable power supply to Luzon's main grid.

The 40 MW/60 MWh Alaminos Energy Storage system, developed by ACEN, is connected to the 120 MW Alaminos solar park in ...

The Meralco Group has already received offers from Power Construction Corporation of China (PowerChina) and China Energy Engineering Corp (China Energy) for ...
