-----  
What is the first government-level photovoltaic + energy storage project in Mexico?

This is the first government-level photovoltaic + energy storage project in Mexico. We collaborated with CFE (Mexican Federal Electricity Commission) to design and supply the BESS (Battery Energy Storage System) for this project.

Does Mexico have a 30% energy storage mandate?

A month after India introduced an energy storage mandate for renewable energy plants and China scrapped its own, Mexico has stepped forward with an ambitious 30% capacity requirement, alongside plans to add a further 574 MW of batteries by 2028.

Will Mexico colocate battery energy storage systems?

Future wind and solar energy projects in Mexico will be required to colocate battery energy storage systems equivalent to 30% of their capacity, a senior government official told the Senate on Tuesday.

Will energy storage systems be integrated into the national electric system?

Earlier in March, Mexico introduced administrative provisions regulating the integration of energy storage systems into the National Electric System. It also revealed that the incorporation of 8,412 MW of energy storage systems is planned for the 2024-2038 fiscal year.

Electric energy storage has become a crucial component in the transition to more sustainable, reliable and efficient energy systems. In Mexico, this concept has taken on ...
