Do Bose outdoor speakers withstand harsh weather?

They're guaranteed to withstand harsh weather. Mount 251® outdoor stereo speakers to your exterior walls, connect to your stereo components and enjoy quality Bose® sound as you move around your garden. With conventional outside speakers, stereo sound can be heard in only a few "sweet spots" and not all around your patio, pool or garden.

What makes the Bose 251® exterior speaker cabinet unique?

Each speaker cabinet houses two drivers set at precise angles so you experience consistent stereo effects as you move around outdoors. And the unique multi-chambered design of the Bose® 251® exterior speaker cabinet minimises audible distortion from low frequencies, for sound with clear, natural impact.

What makes a good outdoor speaker cabinet?

Each speaker has an 8-inch woofer that puts out plenty of deep bass, and the sturdy, rock-shaped enclosures aren't prone to the music-marring sympathetic vibrations that some outdoor speaker cabinets suffer. Bluetooth reception was clear even at a distance of 150 feet, which was as far as we could walk without bumping into a neighboring home.

What are the cheapest passive outdoor speakers?

If you want the cheapest outdoor speakers that still sound decent: The Dual Electronics LU53PW is the least expensive passive outdoor speaker set we've found that's worth buying. The speakers don't have much bass, and they can sound harsh when you crank up the volume because they emphasize the midrange too much.
