How much solar power will Delhi have by 2027?

The Delhi government has announced plans to install 4,500 MW of solar capacity, including 750 MW of rooftop solar within the state and around 3,750 MW of utility-scale solar outside the state by 2027 under the new Solar Energy Policy 2023.

Does Delhi have a solar policy?

Delhi launched its solar policy in 2016, and in 2023, introduced an updated solar roadmap with the goal of achieving 6,000 MW of installed capacity by 2025. Both policies promote solar adoption across residential, commercial, and industrial sectors through capital subsidies, generation-based incentives, and simplified net metering.

How to optimize solar generation in New Delhi?

Assuming you can modify the tilt angle of your solar PV panels throughout the year, you can optimize your solar generation in New Delhi, India as follows: In Summer, set the angle of your panels to 12°; facing South. In Autumn, tilt panels to 34°; facing South for maximum generation.

How much solar power does New Delhi generate a year?

Seasonal solar PV output for Latitude: 28.6328, Longitude: 77.2204 (New Delhi, India), based on our analysis of 8760 hourly intervals of solar and meteorological data (one whole year) retrieved for that set of coordinates/location from NASA POWER (The Prediction of Worldwide Energy Resources) API: Average 5.67 kWh/day in Summer.

Ideally tilt fixed solar panels 12°; South in New Delhi, India To maximize your solar PV system's energy output in New Delhi, India (Lat/Long 28.6328, 77.2204) throughout the ...
