Australia is leading the global battery storage boom with AUD 2.4B invested in Q1 2025. Discover how big batteries are replacing coal, ...

Australia is leading the global battery storage boom with AUD 2.4B invested in Q1 2025. Discover how big batteries are replacing coal, stabilizing the grid, and driving the ...

As the world shifts to renewable energy, the importance of battery storage becomes more and more evident with intermittent sources ...

NHOA has started installing an LFP-based 100MW/200MWh battery energy storage system in Western Australia, the state's largest.

Renewable storage technologies have the potential to revolutionise clean and reliable energy access in remote communities, support cost-effective decarbonisation in industry and ...

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the ...

The organisation's latest "Quarterly Clean Energy Investment Report" found that Australia rounded off 2024 with 870MW/1,936MWh of ...

Uptake of utility-scale batteries in Australia could expand eightfold to 18GW in 2035 from 2.3 gigawatts in 2024, according to a new report published by research provider ...

The first quarter of 2025 was the second best on record for investment in large-scale Battery Energy Storage Systems (BESS) in ...

Renewable storage technologies have the potential to revolutionise clean and reliable energy access in remote communities, support cost-effective ...

Australia's MGA Thermal has completed what it claims is the world's first industrial steam heat energy storage demonstrator project.

Australia's National Electricity Market (NEM) is entering a new phase, driven by the rapid expansion of renewable energy and the ...

Tesla is on track to support two new energy storage projects in Australia with its Megapack grid-scale batteries, each boasting ...

A new 200kW/284kWh community battery energy storage system (BESS) has been switched on in Cammeray, a suburb of Sydney, ...

Since then, investment in grid-scale battery energy storage in Australia's National Electricity Market - or NEM - has continued. 25 projects are now commercially operational in the NEM, ...

A large battery project in South Australia sells for nearly \$500 million as investment in renewable energy surges.

Armed with AU\$1 billion (US\$640 million) in funding, the Energy Security Corporation, a newly founded state-owned body that will ...

The report, "Clean Energy Australia 2023", recapped project activities including construction and investment commitments across wind, solar and energy storage last year, ...
