How big is the battery pack market?

Enjoy complimentary customisation on priority with our Enterprise License! The battery pack market size is forecast to increase by USD 124.4 billion at a CAGR of 14.48% between 2023 and 2028. The market is experiencing significant growth, driven by several key trends and factors.

Does battery supply exceed global demand?

Although battery supply may exceed demand at the global level, the picture is more nuanced and varied by region. Some countries have excess capacity--meaning more than enough to satisfy local demand--while others rely on imports to alleviate local shortages. This regional view could become critical if more countries try to localize production.

Will China tighten export controls on lithium battery materials & production equipment?
