-----

The DDX 9160 is a lightweight and portable PD detector from Haefely for AC, DC, and RIV partial discharge measurements. The fully digital state-of-the ...

The DDX 9160 is a lightweight and portable PD detector from Haefely for AC, DC, and RIV partial discharge measurements. Together with the optional ...

The on-line temporary PD monitoring device can be easily connected via a terminal box to permanently installed partial discharge sensors. This ...

Portable Partial Discharge Monitoring System The OMS 605 is a portable partial discharge (PD) monitoring system designed for online inspections of high-voltage assets under load. It can be ...

The OMS 605 is a portable partial discharge (PD) monitoring system designed for online inspections of high-voltage assets under load. It can be easily connected to existing sensors ...

The on-line temporary PD monitoring device can be easily connected via a terminal box to permanently installed partial discharge sensors. This enables quick and safe plug-and-play ...

Find out all of the information about the IRIS POWER product: partial discharge tester PPM-97(TM). Contact a supplier or the parent company ...

In addition to the undoubted benefits of using online partial discharge monitoring systems, a serious obstacle to their dissemination is still a small number of specialized manufacturers, ...

The DDX 9160 is a lightweight and portable PD detector from Haefely for AC, DC, and RIV partial discharge measurements. The fully digital state-of-the-art detector can accommodate up to ...

Rugged Monitoring High Frequency Partial Discharge (PD) Portable Monitor is a compact and rugged device enabling the user to perform periodic offline and online PD measurements in ...

A portable device for partial discharge generation is designed and developed in this paper, which possesses advantage of miniaturization, dependability and flexibility. Such ...

Detect and assess partial discharges occurring within high-voltage electrical equipment with AVO's comprehensive range of discharge diagnostic equipment.

ICMflex - partial discharge detector, partial discharge fault locator, and loss factor measurement system Power Diagnostix's ...

Portable Partial Discharge Analyzer The DRPD-15 is a lightweight, portable, 15 channel electrical partial discharge (PD) analyser. The DRPD-15 can ...

The Iris Power TGA portable instruments provide the ability to measure partial discharges on assets with previously installed capacitive couplers (for example 1 nF and 2 nF sensors).

The HV Diagnostics high voltage Test System PD120-2/TD offers both portable and build-in solutions for diagnostics of medium voltage cables, rotating machines and transformers. It ...

The ICMmonitor Portable comprises a spectrum analyser, an acoustic detector, and a conventional PD monitor in one instrument. This combination enables PD measurements, ...

The PD30E is an ultra-compact partial discharge (PD) measurement and location system that interfaces to the HVA30 HVA34 or HVA28TD VLF AC test systems.
