What is a rack power distribution unit?

Legrand's Raritan® and Server Technology® brands are the global leaders in intelligent rack power distribution units (rack PDUs). From high-tech startups to hyperscale critical facilities, they are regarded as the standard in powering, monitoring, and managing critical infrastructure.

What is a metering-by-outlet rack power distribution unit?

Metered-by-outlet Rack Power Distribution Units (Rack PDU) provide real-time remote monitoring at the outlet level to provide advanced data center energy management. World leader in Rack Power Distribution now with Metering-by-Outlet! Metered rack Power Distribution Units (PDUs) provide real-time remote monitoring of connected loads.

What is a Rackmount power distribution unit (PDU)?

A Rackmount Power Distribution Unit (PDU) is a critical component for managing and distributing electrical power within a server rack or network cabinet. It is designed to provide multiple outlets in a centralized location, ensuring that devices such as servers, switches, routers, and other equipment receive a stable and consistent power supply.

What is a rack-mount PDC (RPDC)?

Delta's rack-mount PDC (RPDC) is an ideal power distribution solution to small datacenters up to 80kVA. Composed of a 4U cabinet, the RPDC can be perfectly integrated with standard server racks and results in saving valuable datacenter space.

With customizable configurations (tailored for both standard low voltage distribution cabinet and precision-engineered Mid-mounted distribution cabinet) and advanced protection features, the ...

USPWR provides proven, best in class Cabinet Power Distribution Units (PDUs) including 3 Phase PDUs and
