How much does a battery energy storage system cost?

In 2025, the typical cost of commercial lithium battery energy storage systems, including the battery, battery management system (BMS), inverter (PCS), and installation, ranges from \$280 to \$580 per kWh. Larger systems (100 kWh or more) can cost between \$180 to \$300 per kWh. How does battery chemistry affect the cost of energy storage systems?

How much does a commercial lithium battery energy storage system cost?

In 2025, the typical cost of a commercial lithium battery energy storage system, which includes the battery, battery management system (BMS), inverter (PCS), and installation, is in the following range: \$280 - \$580 per kWh (installed cost), though of course this will vary from region to region depending on economic levels.

How can government incentives help a commercial energy storage system?

Government incentives, such as tax credits, rebates, and grants, can significantly lower the upfront costs of commercial energy storage systems. In the U.S. and Europe, businesses may receive tax credits of up to 30% of the system cost, making the investment more financially viable.
