How competitive is the European home storage market?

The European home storage market is highly competitive among manufacturers. According to surveys by EUPD Research, BYD maintained its leading position in Europe in 2024 with a market share of around 20%, which is expected to increase to 21% this year.

Will European home storage market continue to grow?

However, given the continued decline in storage prices, continued growth is expected in Europe as a whole. The European home storage market is highly competitive among manufacturers.

How many photovoltaic home storage systems will be installed in Europe?

For the entire year, analysts expect more than one million photovoltaic home storage systems to be installed across Europe, with demand increasing further in the second half of the year. "Growing interest in dynamic electricity tariffs and increased self-consumption are expected to boost demand among homeowners," EUPD Research says.

Which country has the most rooftop PV installations in Europe?

In Europe, Germany remains the undisputed leader even after a slight decline in new installations in the first half of 2025. The 6% year-on-year decline is due to lower new installations of rooftop PV systems, fewer regional incentives, and an increasing shift in focus to commercial and industrial storage, explained EUPD Research.
