Learn the steps involved in Solar EPC project management, from initial planning and design to procurement, construction, and commissioning.

These resources provide information and best practices for federal facilities interested in procuring on-site solar photovoltaic (PV) systems.

This work was authored in part by the National Renewable Energy Laboratory, operated by Alliance for Sustainable Energy, LLC, for the U.S. Department of Energy (DOE) under ...

There are three key types of procurement contracts--power purchase agreements (PPAs) or energy storage services agreements; engineering, procurement, and construction ...

Decide whether to include solar + storage projects in a procurement based on storage benefits for addressing energy cost savings and/or resilience use cases at specific sites.

A Solar Power Purchase Agreement (SPPA) is a financial arrangement in which a third-party developer owns, operates, and maintains the photovoltaic (PV) system, and a host ...

An energy storage cabinet is a device that stores electrical energy and usually consists of a battery pack, a converter PCS, a control chip, and other components.

Provides federal agencies with a standard set of tasks, questions, and reference points to assist in the early stages of battery ...

This chapter supports procurement of energy storage systems (ESS) and services, primarily through the
