What is Envision Energy's first independent battery energy storage contract in France?

This project marks Envision Energy's first independent battery energy storage contract in France, following recent successes in Europe. Beginning construction in June 2025, Envision Energy will supply a minimum of a 14 year long-term maintenance (LTSA) agreement, providing continuous presence in the region beyond the construction phase.

How many GW of energy storage will Europe have in 2024?

EU-wide storage capacity rose from 4.6 GW in 2021 to 34 GW in 2024. In France, capacity increased tenfold in four years, from 100 MW in 2020 to 1.1 GW in 2024. According to the European Energy Storage Association, 200 GW of storage will be required across the EU by 2030, implying annual deployment of at least 14 GW.

How much battery storage will Europe need by 2030?

According to the European Energy Storage Association, 200 GW of storage will be required across the EU by 2030, implying annual deployment of at least 14 GW. In France, the multiannual energy program #3 (PPE 3), which is expected to be published soon, foresees a significant increase in battery storage.

Is France a key market for Envision Energy?

Henry Peng, Senior Vice President and President of Latin America and European Region, Envision Energy, said: "France is a key market for Envision Energy as we expand our presence across Europe, and our partnership with Kallista Energy marks a significant milestone in this journey."

Unveiling a robust 100KW/215kWh energy storage system ideal for large-scale commercial and industrial use. Experience enhanced grid stability, ...
