**What is warehouse racking cost?**

Warehouse racking cost refers to the total investment required to purchase, install, and maintain storage systems. Prices vary based on: System type (selective, drive-in, push-back, etc.) Material (steel, wire, or hybrid designs) Load capacity and height Customization needs

**Why is racking so expensive?**

That means that the racking is slightly more expensive because it is immediately available. If you were to order racking that is ordered specifically for a project, the lot pricing might be slightly cheaper. Additionally, the racking comes with seismic base-plates which adds cost.

**How much does a pallet rack cost?**

Expect to pay about \$300 to \$500 for each pallet rack of this type. This racking system allows pallets to be stored up to six deep on either side of an aisle, giving you a higher storage density than selective and drive-in racks. The two most popular variations of push-back racks include one with rollers and another with shuttles.

**How much does drive-in pallet racking cost?**

To have drive-in pallet racking functional in your warehouse, you will need to invest about \$30 to \$70 per pallet position. Some models with a higher number of depths will be more costly, reaching up to \$140 per pallet position.
