In an accelerating investment wave, companies in Romania are combining BESS with solar power, hydropower and wind power, or building standalone energy storage facilities. The group includes R.Power, Hidroelectrica, Engie and more big names.

Is battery energy storage a pillar of Romania's energy transition?

Recent updates about investments in battery energy storage systems (BESS) in Romania indicate the technology is becoming another pillar of the country's energy transition alongside wind power. For several years now, photovoltaics, and prosumers in particular - including municipal authorities, have dominated the scene.

How much battery storage does Bess have in Europe?

Battery storage makes up 17.5 GW or more than half of its total development pipeline in Europe. The company said it would hybridize its existing and future PV assets and scale the integrated capacity to several gigawatts in the coming years. It has over 1.2 GW of projects for standalone BESS in Romania.

How much money will Romania spend on Bess?

He added that the Romanian government will commit EUR380 million from the National Recovery and Resilience Fund and the Modernisation Fund to building BESS, with the goal of exceeding 3 GWh in the coming years. Analyst Aurora Energy Research predicts BESS investments in Romania will reach into the billions before long.
