Which energy storage systems are eligible for a 30% ITC credit?

Energy storage systems that are charged by a renewable energy system 75% or more of the time are eligible for a like percentage of the 30% ITC. For example, a storage system that is charged by renewable energy 80% of the time is generally eligible for the 30% ITC multiplied by 80%, which equals a 24% ITC instead of a full 30% credit.

What is the annual abatement for energy storage systems?

The annual abatement for energy storage systems is generally equal to the lesser of 10% of the energy storage system's costs or \$62,500. The annual abatement for solar energy generating systems is generally equal to the lesser of 5% of the project's costs or \$62,500.

What is the current ITC for energy storage systems?

Presently, the ITC is 30%, but is scheduled to decline after 2019, as shown in Table 1. Energy storage systems that are charged by a renewable energy system 75% or more of the time are eligible for a like percentage of the 30% ITC.

What are electric energy storage technologies?

Electric energy storage technologies may store energy as potential, kinetic, chemical or thermal energy that can be released as electric power, and include, but are not limited to, various types of batteries, flywheels, electrochemical capacitors, compressed air storage and thermal devices.

The U.S. Department of Energy's solar office and its national laboratory partners analyze cost data for U.S. solar photovoltaic systems to develop ...

Let's cut through the jargon jungle - when we talk about Xiaogangting photovoltaic energy storage systems, we're really discussing the Swiss Army knives of renewable energy. But who exactly ...
