In a ground breaking development for renewable energy in Ireland, FuturEnergy Ireland has proposed a pioneering iron-air battery storage project in Donegal County. If ...

At Ørsted, we're utilising solar power to harness nature's resources and deliver clean, renewable power to the population. We develop, construct, ...

In line with our commitment to drive its development and deployment, in 2022, we inaugurated Gorman - our world's first commercial-scale battery system. This 50 megawatt (MW) facility ...

In 2021 energy experts Baringa estimated that to hit the 80 per cent renewable electricity targets in Ireland and Northern Ireland by 2030 we would need at least 1,700 MW of battery storage ...

The company is planning to invest up to EUR100 million in new onshore renewable and storage projects in Ireland by 2025, by which time it aims to have 16GW of solar installed ...

In just two years, Ireland's installed solar capacity has increased by 159.8%. When we launched our first Scale of Solar report in 2023, solar energy in Ireland was still emerging. But today, it's ...

A number of the BESS facilities currently in development are part of hybrid projects, which will see storage installed alongside existing solar and wind farms. By facilitating the ...

Ireland's solar capacity hit a remarkable 1.76 GW in 2024, a 160% annual increase. Explore the key projects, production stats, and future renewable energy goals.

The core of the MiniStor (Minimal Size Thermal and Electrical Energy Storage System for In-Situ Residential

Installation) project is a novel approach to energy storage, ...

Every battery storage project connected makes our electricity grid more secure and helps to integrate wind and solar power. Today, in May 2022, we have 13 projects operating with a ...

"We project 4.7 GW installed by 2030, more than doubling capacity in the next five years, from 2.2 GW expected by the end of 2025," the report stated, adding that long-duration ...

Voltalia will build, operate and maintain four key solar projects in southeast Ireland, culminating in a whopping 230 MW capacity. This monumental move aligns with Ireland's ...

With at least 720MWh of energy storage deployed - and 1GWh in construction - the growth of the energy storage market in Ireland has been rapid, considering the first project ...

Tesla solar makes it easy to produce clean, renewable energy for your home and to take control of your energy use. Learn more about solar.

Ireland's first grid-scale battery system was commissioned at the beginning of 2020 but was followed just a few months later by another ...

A partnership between Irish renewable energy group NTR and London-based Legal & General (L& G) has acquired a 211-megawatt (MW) hybrid solar and battery storage ...

Supplier of the first four-hour 20MW grid-scale battery energy storage system in Co. Offaly, which is being built by Statkraft. Key figure: ...

The new "Scale of Solar 2025" report by Solar Ireland claims Irish solar has grown by almost 160% since 2023, with the country's ...
