How much does a commercial solar system cost?

Commercial solar installations are a great way for companies to lower energy costs. Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt.

How much does a solar panel cost?

Some municipalities also add special inspection or net metering setup fees. Panel selection creates subtle cost differences. Standard monocrystalline panels in 2025 cost around \$0.80-\$1.00 per watt, while polycrystalline panels average \$0.60-\$0.75 per watt.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.

How much does a commercial solar system cost in 2025?
